1. Claims 1-4, 6 and 7 are again rejected under 35 U.S.C. 103(a) as being unpatentable over applicants' statement of the prior art.

In their 131 Declaration of 08/24/2005, applicants acknowledge that "Neither the composition nor the paper base used in this invention is new ...". The presence of mordants in this composition clearly identifies it as one that is ink receiving. Applicants further acknowledge on pages 1 and 2 of their specification that coated paper bases and receiving layers containing hydrophilic polymers, hardening agents and mordants are well known in the ink jet recording art. Consequently, use of a known ink jet recording base in combination with a known ink jet recording layer would have been obvious to one of ordinary skill in this art in the absence of unexpected results.
